

Gas Stones, Contemporary Alternative to Gas Log Sets

Designed by

GAVIN SCOTT DESIGN™

A gas log set with no logs! Finally! Clean, Contemporary and thoroughly Modern. If you are looking for a modern alternative to Gas Logs, Gas Stones is it. Designed in England, by Gavin Scott Design, this minimalist design will provide you with a calming, uncluttered presence in your fireplace.

Gas Stones is comprised of the following: NG or LP burner, black or white Fusion Basket, remote control and a set of 27 ceramic beach stones.

If you are using natural gas, you have the choice of a Vented or Vent free burner. Our propane burner is available as vented only. With all burners, we recommend bringing your gas pipe in from the rear or bottom for the cleanest look.

Specifications

Min-Max BTU input/hr	
- Vented NG	27,000 – 42,000
- Vent Free NG	27,000 – 39,000
- Vented LP	27,000 – 42,500
Dimensions	24" W (front and back) x 12" D x 6.3/4" H (approx. 10" H with stones)
Fireplace Minimum Size Requirements	Opening must be large enough to fit Fusion Basket with enough clearance so that it sits behind the fireplace lintel. Fireplace must have a minimum opening height of 18" Fusion Basket is 24" L x 12" H x 6.3/4" H
Remote Control	Yes, standard
Basket	White or black stone-like material.
Supports LP	Vented only. This is a factory set option. Must be specified at time of order.
Installation and Venting, vented burner	Vented: Designed for use in a vented, wood burning fireplace with the damper and glass doors open during operation.
Installation and Venting, vent free burner	Vent Free: Designed for use in solid-fuel burning masonry or UL 127 factory-built fireplace or in a listed ventless firebox enclosure.
Pilot	Electronic Ignition
Certification, vented	ANSI Z21.60.2004, CSA 2.26-2004 Decorative Appliances for Installation in Solid-Fuel Burning Fireplaces and CAN1-2.17-M91, Gas-Fired Appliances for Use at High Altitudes.
Certification, vent free	ANSI Z21.11.2-2007, Unvented Heaters.

Due to high temperatures, stone pigments will change with use.

The information provided in this literature is for planning purposes only. Please consult the installation manual for actual installation. Care must be taken when in use. Do not allow objects or body parts to be put into the fire, into the opening for airflow or to touch the stones. Stones retain heat after fire is extinguished.
