Vision shown with Blue Panels and Red Concrete Surround, 54" x 28"

Vision shown with Black Panels and White Concrete Surround, 54" x 28"

The Vision Fireplace, designed by Gavin Scott Design of England, offers a fresh simplicity in fireplace design. With an open front face and clean lines, the Vision showcases the beauty of basic shapes. Vision is available in vented and vent free versions. Vented supports NG and LP. Vent Free supports NG only.

Shaw Club Hotel & Spa
Vision shown with Stainless Panels and Stainless Surround, 54" x 28"

Your Vision Fireplace can be finished in a variety of ways. Surrounds are available as options in concrete and stainless steel. Our concrete is available in an infinite variety of colors.

Other options are to design your own surround in any non-combustible material – such as tile or stone – or simply bring non-combustible wall board to the opening for a real ‘hole-in-the-wall’ look. The simplicity of such an installation will give your room a stunning focal point.

Whatever finishing method you choose, Vision will enhance your room by allowing your style to shine through.

Vision shown with White Liner Panels and White Concrete Surround

Minimalism – Less is more.

Minimalism – A style or technique characterized by simplicity.

Minimalist – One who appreciates minimalism.
