

Installing Glass Concrete Panels

Included:

Glass Panels

Self-tapping screws (Installed)

Clips to secure panels (Installed)

Make sure that the hearth tray is pushed back tight against the rear wall.

With the panel held in position, hold the slotted “L” shaped clip to the ceiling and the other end against the glass. Leave 1/16” space top allow for expansion. Use the self-tapping screw to secure the clip to the ceiling. The slot will allow you to adjust the clip.

Arrange the rear panels (marked B1, B2, B3, and B4) as above with one clip supporting two panels.
