

## **European Home Introduces the First Outdoor Corner Style Gas Fireplace**

**MIDDLETON, Mass. – August 7, 2018** - [European Home](#), manufacturer of modern gas fireplaces, introduces the J Series Outdoor Corner Gas Fireplace, the first of its kind in the hearth industry. The state of outdoor living spaces is undoubtedly evolving. The J Series Corner Style Fireplace is the quintessential symbol of this shift to a more elegant outdoor space. This corner fireplace is a bold stylistic choice for the modern patio.

The J Series features an asymmetrical design and a completely frameless configuration which activates your outdoor architecture in a way a classic fire-pit simply never could. According to Holly Markham, Founder and President of European Home, "The thing that really distinguishes this outdoor fireplace from the rest is its bold corner configuration, artistically crafted fire media, and the flames, you just have to see these flames."

Constructed of thick-gauge stainless steel in the heart of New England, this outdoor fireplace is built to withstand the elements. Speaking of the elements, at 76,000 BTU/hr. the J Series is a wonderful heating source to curl up next to on a chilly fall evening.

The J Series outdoor fireplace line is designed and manufactured in the United States by European Home. All their luxury fireplace products are sold through their network of local professional fireplace specialists.
