Operating Instructions

for E-touch App Control

EuropeanHome electric fireplaces

Downloading the E-touch App

The E-touch app can be used with both smart phone and tablet devices **(OS and/or Android).**
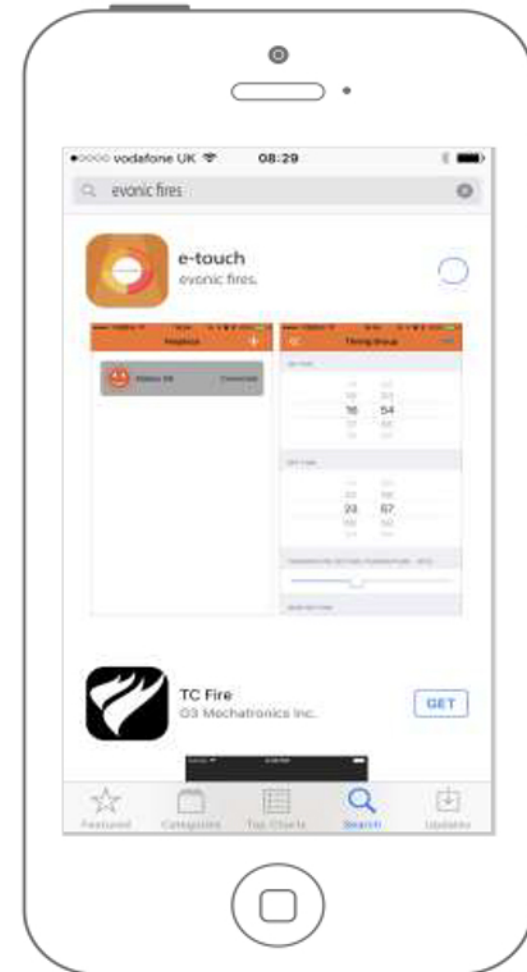

Utilizing the E-touch app will allow complete controllability of your Electric Modern product.

To download the E-touch app please follow the steps below.

1) Access either the Apple App store or Google Play on your device; this is dependent on the operating system of your smart phone or tablet.

2) Search, locate and download the App entitled **'e-touch'** (look for the orange logo above).

Note: When using a tablet filter your search to include smartphone apps.

(Please Note: The screen shots used in this manual are taken from OS operating system there will be some slight variations for Android operating systems).

Pairing your Fireplace to your Device

Note: Fireplace pairs to your device via Bluetooth. Ensure that your Bluetooth setting is activated on your device before attempting to pair.

Only one device can be paired to the fireplace at any given time.

3) Ensure that the fireplace unit is switched to the 'ON' position.

4) Open the (E-touch) App and the above screen will appear.

5) To ADD your Electric Modern product, simply click the **+** button at the top right of the screen.
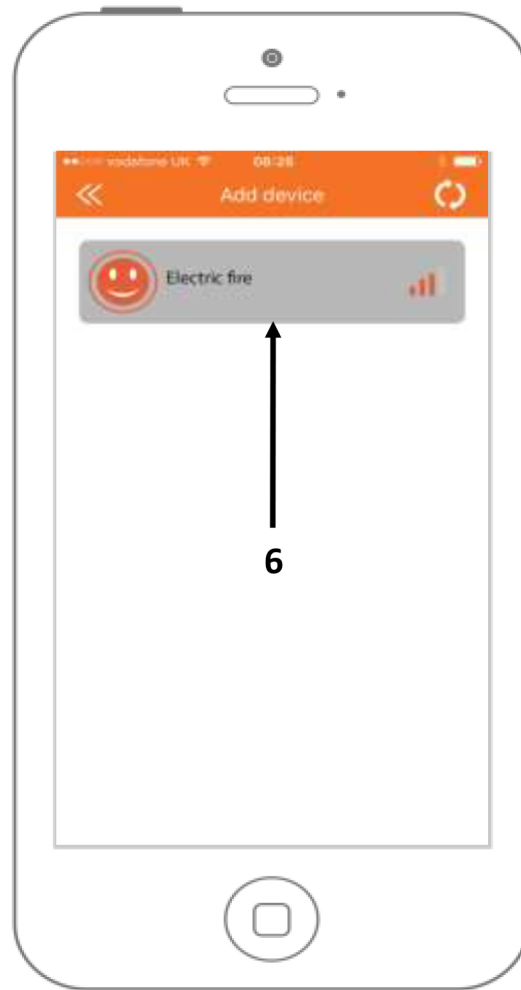

Pairing your Fireplace to your Device Continued:

The E-touch App will then begin to scan for your
Electric Modern fireplace.

(Please note: To enable the E-touch app to find/discover your Electric Modern fireplace, the smart phone or tablet must be no more than 3 feet away from the product).
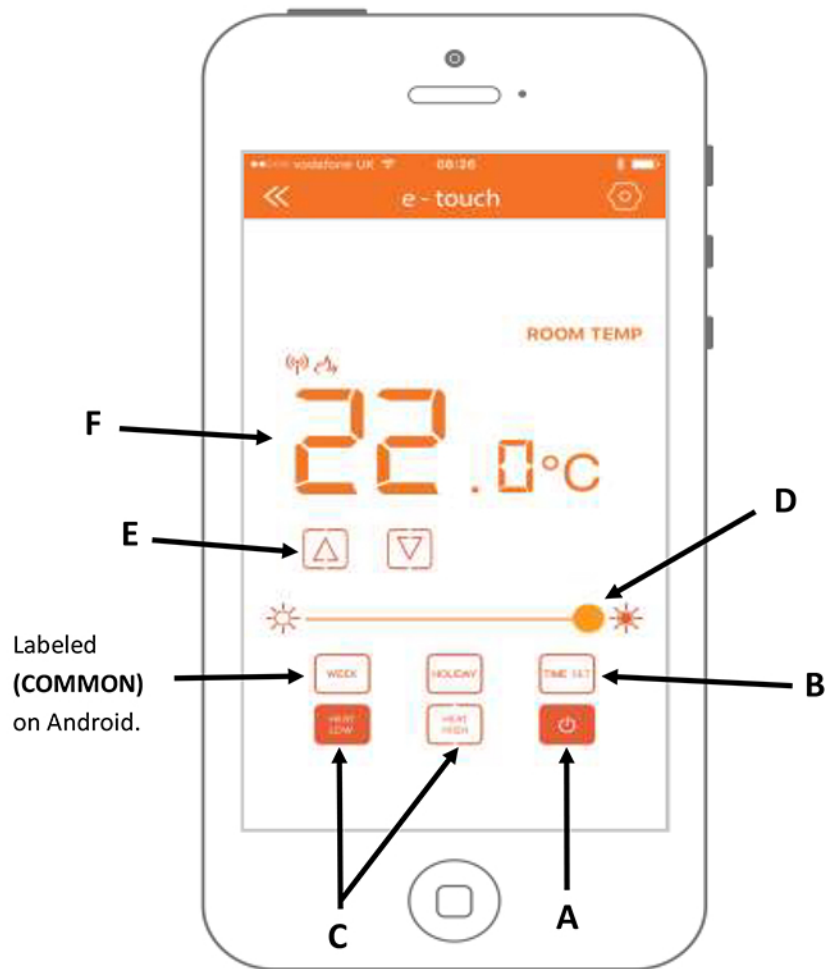

Pairing your Fireplace to your Device Continued:

5) Once the E-touch App has discovered your Electric Modern product, the above screen will appear.

6) To connect to your Electric Modern fireplace simply click on the Electric fire icon.

Your electric fireplace is now paired and ready to operate.

Programming the Seven-Day Timer Continued:

Troubleshooting:

1. **E-touch app will not connect to product:** Ensure that the rocker/power switch is in the on position on your product and re-scan for the product using the app.

Ensure that the smart phone or tablet is within range of the product (3 feet).

2. **Seven-day timer program will not activate:** Ensure that the **(Week)** button is highlighted on the home screen and the time settings are set correctly *(see pages: 7-10).*

4. Select the gear setting or power on which power you would like the heater to activate on (Heat Low—1Kw) or (Heat High—2Kw).

5. Select on which day or days you would like your timing program to active or repeat.

6. To confirm your timing program Click (OK).

7. Ensure that the **(WEEK)** button is highlighted on the Home screen to active your timing program.

Once your have activated your timing program, this can be bypassed by pressing the **(HOLIDAY)** button on the home screen.
