Installation & User Instructions—Model: E-Touch Control System

Once installed, the installer should take the appropriate steps to ensure that the user understands how the appliance operates and should make the customer aware of the appliances basic service requirements.
What is the e-touch control system?

The e-touch allows complete controllability of any e-series product.

The control system is a fully portable, rechargeable Bluetooth based touch screen unit, featuring a built-in thermostat enabling you to regulate and maintain the selected room temperature with ease.

The programmer allows you to set “On” and “Off” periods to suit your own lifestyle.

The room thermostat works by sensing the air temperature, switching on the heater when the air temperature falls below the e-touch setting, and switching it off once this set temperature has been reached.

The e-touch allows you to choose what times you want the heater to be on, and what temperature it should reach while it is on. It will allow you to select different temperatures in your home at different times of the day (and days of the week) To meet your particular needs and preferences.

Setting the e-touch to a higher temperature will not make the room heat up any faster. How quickly the room heats up depends on the layout and size of the room.

Similarly reducing the temperature setting does not affect how quickly the room cools down. Setting the e-touch to a lower temperature will result in the room being controlled at a lower temperature, and saves energy.

The best way to do this is to set the e-touch to a low temperature —say 18°C, and then turn it up by 1 degree each day until you are comfortable with the temperature.

The e-touch control system requires a free flow of air to sense the temperature, so it must not be covered by curtains or blocked by furniture.

The temperature on the remote can only be in Celsius.

The time on the remote can only be set to military time, (24 hour clock).
E-touch LCD touch screen Display Layout:

- **8**: AUGUST 04 2017
- **9**: Room Temp
- **10**: °C
- **11**: °C

- **1**: Power
- **2**: Week
- **3**: Holiday
- **4**: Time Set
- **5**: Heat High
- **6**: Heat Low

- **7**: 15:20
E-touch LCD touch screen Display:

1). On & Off Key - Single press to turn product on and off.

2). Setup/ Seven day programable timer keys - Used to navigate timer options.

3). Heat high / Heat low keys - Single press to select 1 or 2Kw of heat output.

4). Dimmer Keys - Single press to increase or decrease the brightness of flame effect.

5). Battery Display - Indicates power remaining to the control system.

6). Time Display - Shows local time.

7). Day Display - Shows week day.

8). Date Display - Shows Month / Day / Year.

9). Connection Display - Shows when e-touch is connected to product.

10). Room Temperature Display - This displays the desired room temperature.

11). Temperature Control Keys - Single press to increase or decrease temperature when setting desired room temperature.
E-touch clock and date setup:

To set the clock, follow the below steps.
- Single press the time display on the e-touch control system.

The following screen will be displayed.

- Press (A.) to increase or decrease hours.
- Press (B.) to increase or decrease minutes.
- Press (C.) to return back to the home screen.

To set the date, follow the below steps.
- Single press the date display on the e-touch control system.

The following screen will be displayed.

- Press (A.) to increase or decrease Month.
- Press (B.) to increase or decrease Days.
- Press (C.) to increase or decrease Years.
- Press (D.) to return back to the home screen.
Pairing and general operation of e-touch control system:

To pair the e-touch control system with your e-series product please follow the below steps:

1). Ensure that the main standby power switch on your electric fireplace is switch to the “On” position.
(This switch can be located to the right of the heater outlet on your electric fireplace).

Once this switch is activated your e-series product will omit a single flash from the LED’s of the flame effect to indicate that the product has power.

2). Switch the e-touch control system “On” by pressing and hold the On/Off switch located on the top left of the e-touch for 4x seconds.

3). Once the “start up” screen appears (Fig:1) displaying the time, date and day, single press the On/Off switch once on the e-touch control system - This will initiate the e-touch to “Scan” for your e-series product. See (Fig:2).

(Fig:1)  
(Fig:2)

Please Note: After 1x minute of non use the e-touch will enter sleep mode, this is identified by the screen going blank - to reactivate the e-touch simply press the screen followed by pressing the “On/OFF” button on the top of the e-touch control unit once to commence the scanning process.
4). Once the e-touch control system is paired with the e-series product the “Home” screen will appear. (Fig:3)

5). Once the above “Home” screen appears - this indicates that the e-touch and e-series product are now paired.

6). To switch on your e-series product Single Press “A.”, This will activate the flame effect.

7). To switch the heater function “On” simply increase the temperature by pressing “B.” the temperature control keys.

8). To switch the heater function “Off” simply decrease the temperature by pressing “B.” the temperature control keys.

9). To adjust the brightness of the flame effect simply Increase or decrease the luminescence by pressing “C.” the dimmer control keys.

10). **Please Note:** After 1x minute of non use the e-touch will enter sleep mode, this is identified by the screen going blank - to reactivate the e-touch simply press the screen followed by pressing the “On/OFF” button on the top of the e-touch control unit once to commence the scanning process see Page 6—(Fig:2).

11). For further control and function options please refer to pages 8-9.
Programming the 7 Day timer:

To access the 7 Day programmable timer, follow the below steps.

1). Single press the **TIME SET** display on the e-touch control system.

The below screen will be displayed.

2). Single press the “Week Mode” key, and the below screen will be displayed.

7 Day programmable timer display:

A.) **Timing Group** - Single press “ADD” to add one or more groups.
C.) **Week Day Display** - Single press to select day of the week.
D.) **Temperature Display** - Single press to increase & decrease the temperature.
E.) **Gear/Heater Output** - Single press to select heater High or Low.
To set a programme on the 7 Day programmable

1. Single press & select what time you would like the heater to switch On. (ON TIME)
2. Single press & select what time you would like the heater to switch Off. (OFF TIME)
3. Single press & select on which day you would like the time selected to be actioned.
4. Single press & select what temperature you would like the set program to switch on at.
5. Single press & select what Kilowatts you would like the set program to switch on at.
6. Single press “OK” once the program has been set. This will return you back to the home screen.
7). Single press the “WEEK” key (A.) on the home screen to activate time programs that have been set.

8). Once you have programmed your time programs, these will repeat each week on the original day and time set.

9). To override this function without losing your information, simply press the “TIME SET” key and select “Holiday Mode” see page 8.

10). Ensure that all the time options in “Holiday Mode” are set to zero.

11). Then single press the “Holiday” key (B.) on the home screen, when this key is highlighted all time programs will be inactive.
Charging the e-touch

The e-touch is provided with a USB to micro USB cord.

Simply Plug the smallest end of the lead into the charge point of the e-touch, and the larger USB lead into a computer 5-volt USB charger (not included).

Leave to charge for a minimum of 3 hours.

To monitor the charging progress press and hold the ON/OFF switch for 4 seconds, the e-touch will then switch on and the battery icon is located in the top right of the screen.

Battery

Do not attempt to replace the e-touch battery yourself—you may damage the battery, which could cause overheating, fire and injury. The Lithium-ion battery in your e-touch must be recycled or disposed of separately from household waste. Dispose of batteries according to your local environmental laws and guidelines.

If the e-touch is damaged or lost a backup smart phone App is available at Google Play & Apple App store.

For instructions on how to obtain the App please visit www.europeanhome.com
