

Outdoor Fireplaces & Grills

Timelessly Clean & Modern

J SERIES M2 - GAS

Light up the night! This sophisticated outdoor linear or see-through gas fireplace features LED interior lights and robust flames. It's the perfect accompaniment to a chic outdoor cocktail party or a simple and cozy fire with family and friends. No collecting wood or minding the fire, simply use the remote control to ignite your flames, start the multi-colored LED light display and enjoy the warmth and ambiance this outdoor gas fireplace provides.

60" SINGLE-SIDED

60" SEE-THROUGH

The J Series M2 modern outdoor gas fireplace is completely vent-free, therefore offering greater flexibility for your outdoor patio design.

60" CORNER STYLE

**J SERIES - GAS**

A contemporary linear gas fireplace, available in a corner style, that adds warmth and tantalizing allure to your outdoor living space. Featuring weather resistant stainless steel and a completely trimless aesthetic. Simple, clean and timelessly modern.

Our entire line of J Series outdoor fireplaces are vent-free, which eliminates the need for venting and offers greater flexibility for your outdoor design.

J SERIES 40H - GAS

The J Series outdoor, See-Through fireplace with its LED lighting and weather-resistant stainless steel now has a new shape. At 40 inches wide, this model has all of the features that make the J Series M2 distinct.

Additionally, the J Series 40H features a choice of two burner types. The Linear Burner creates an even line of flame that looks impressive with our glass fire media or Carrara Pebbles. The Campfire Burner has tapered flames on the sides and increases in height to the middle. Paired with the Log Set media it creates a natural campfire look. Both burners have robust flames that dance about in mesmerizing beauty.

focus

GYROFOCUS - WOOD

This seminal design, created by Dominique Imbert in 1968, was the first suspended, 360 degrees pivoting fireplace. It is revolutionary as much for its technical design as its groundbreaking style.

PAXFOCUS - WOOD

The wall version of the floating Ergofocus, the classy and space-saving design of the Paxfocus outdoor fireplace is a perfect fit for any patio. The wood-burning, natural vent hearth allows warmth to be radiated throughout your outdoor living space. With its clean, minimal lines this fireplace adds a truly unique conversation piece to your outdoor space.

ERGOFOCUS - WOOD

This suspended and rotating version of the Paxfocus is a stunning option. Its pure, elegant shape is not only perfectly proportioned, but maximizes heat efficiency. The blend of function and form makes the Ergofocus one of the most popular of Focus' suspended models.

ÉMIFOCUS - WOOD

This model's elegant yet discreet form, heat efficiency and easy installation combine to create an intimate and warm atmosphere in a range of different settings, from mountain ski chalets to suburban back yards.

BATHYSCAFOCUS - WOOD

With a nod towards the sea, this round, compact fireplace has a serene, understated and warm presence. This floating version of the Émifocus rotates 360 degrees so the fire can be turned to create drama and ambiance in all directions.

Finishes Available

Anti-Corrosion Black Paint

Hematite Rust

BUBBLE - FIRE BOWL

The Bubble is a contemporary wood-burning fire bowl that brings its stylish originality to any outdoor space. Its open fire provides the perfect centerpiece to extend long summer nights or take the chill off autumn evenings. The brazier's simplicity and sophistication, a hallmark of Focus design, as well as its performance make it suitable for a wide range of exterior settings, from gardens to roof terraces to patios. Measuring 27 1/2" in diameter, this wood burning fire bowl is equipped with two rear caster wheels so it can be easily moved on a flat surface. The basin can be removed for maintenance and cleaning. The model's anti-corrosion finish is designed to withstand outdoor conditions so it will keep its eye-catching look over the seasons.

DIAGOFOCUS - OUTDOOR GRILL

Introducing the multi-talented Diagofocus - thanks to its wheels, it can turn its back to the wind, or be guided to the ideal location to avoid the eccentricities of the winds and the seasons.

This attractive barbecue and welcoming outdoor fireplace is also generous, protecting hosts and guests from smoke, as well as guarding from the flames the food that has been entrusted to it for grilling.

OPTIONAL COVER

The generous ash pan allows the barbecue to be used a number of times without having to empty it out. The mounting disc protects the wall from smoke.

SIGMAFOCUS - WALL BARBECUE

This steel wall barbecue folds up, so that when closed it takes up limited space. Attractive in both open and closed positions, the Sigmafocus offers a range of cooking heights. It is easy to attach to any wall (there are only two fixation points).

FOLDS UP WHEN NOT IN USE

Available Locally Through:

SUNFOCUS - OUTDOOR FIREPLACE

This wall-mounted brazier serves up its flames like an enthusiastic waiter. Its elegance, simplicity and panache make the Sunfocus radiate style. It can also be used as a barbecue
