

INSTALLING GLASS CONCRETE PANELS

Included:

- Glass Panels
- Clips to secure panels
- Self-tapping screws (Installed)

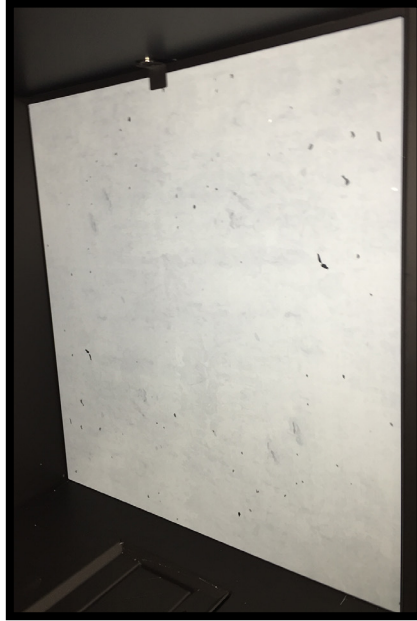

Figure 1

Install the left and/or right sides first.

Figure 2

With the panel held in position, hold the slotted "L" shaped clip to the ceiling and the other end against the glass. Leave 1/16" space at top to allow for expansion. Use the self-tapping screw to secure the clip to the ceiling. The slot will allow you to adjust the clip.

Arrange the rear panels (as above with one clip supporting two panels.)
